

DELTA ROE

Website Owner's Manual

deltaroe.com · prepared for Tamika Banks · July 2026 · v1

Everything you need to run your website day to day — no technical skill required. Keep this with your business records; it will be updated at launch and whenever anything changes.

1 · The Big Picture

Your website is made of three parts, and you manage each in a place designed for it:

PART	WHERE YOU MANAGE IT	WHAT LIVES THERE
The website itself (pages, chakra experience, Roe)	It runs itself — changes are requests to your web person	All pages, service descriptions, the interactive chakra journey, the Roe chatbot, FAQs, reviews
Bookings & services	Square Appointments dashboard (after launch; Wix scheduler until then)	Your calendar, session types, prices clients pay, deposits, gift cards, memberships
The Apothecary shop	Shopify dashboard (when the store opens)	Products, prices, orders, customer shipping — suppliers ship for you

Golden rule: prices and availability that clients pay live in Square/Shopify and you can change them yourself anytime. Words and images on the website are change requests — usually done same-day.

2 · Day-to-Day: Bookings (Square Appointments)

- **Your calendar:** the Square Appointments app (phone or computer) shows every booking; clients book from the website's "Book a Session" buttons.
- **Change a price or session length:** Square dashboard → Items & Services → edit. Live immediately. (Tell your web person too, so the website's displayed menu matches — see section 5.)
- **Deposits / no-show protection:** Square settings let you require a card or deposit at booking.
- **Gift cards & memberships:** sold and tracked in Square; the website's Gift Cards and Memberships pages point clients there.

- **Getting paid:** Square deposits to your bank account (standard next-business-day). Fees only when a card is charged (~2.6% + 10¢).

3 · Day-to-Day: The Apothecary (Shopify, when live)

- **Orders:** appear in your Shopify dashboard; your suppliers (candles, oils, crystals, apparel) make and ship each order under the Delta Roe label — you never pack a box.
- **Add / edit / price a product:** Shopify → Products. Photos, description, price — yours to control.
- **Switching suppliers:** you are locked into no one. A local artisan's product can join or replace any item — new photos + description + their fulfillment arrangement.
- **Money:** Shopify pays out to your bank; margins on the private-label plan run ~45–65% depending on product.
- **Until the store opens:** the shop page on the site is a hidden preview (search engines are told to ignore it). Nothing can be bought there.

4 · The Website, Page by Page

PAGE	WHAT IT DOES
Home	Your front door — the "Hear Your Chakras" hero, service menu with prices, reviews, booking buttons everywhere
Services (10 pages)	One page per offering (reiki, sound bath, chakra alignment, fascia, coaching, combos, discovery call...) with pricing, what-to-expect, and FAQs — written to rank on Google for Elk Grove searches
The Sound of Your Seven Chakras	The interactive experience — glowing chakra symbols on the meditation figure, real crystal-bowl tones at each chakra's frequency ("Hear your chakras" button), ends by inviting a sound-bath booking
Memberships · Gift Cards · Events	Your recurring-revenue pages — tiers, pricing, and calls to action
Reviews · About · FAQ	Trust: your story, client words, and 36 questions answered (also feeds Google's understanding of your business)
Roe (the chat bubble)	Your always-on greeter. She answers questions in your voice from a hand-written knowledge base — friendly, accurate, always steering gently toward self-care and booking. She is not connected to any AI service; she says only what's been written for her, so she can never go off-script. Costs \$0 to run.

5 · Making Changes to the Website

YOU WANT TO...	HOW
Change a price clients pay	Yourself, in Square/Shopify (instant) — then tell your web person so the website's menu text matches
Change wording, photos, services offered, or FAQ answers	Text/email your web person — typically a same-day change
Teach Roe a new answer	Send the question + the answer as you'd say it; it's added to her knowledge base
Add an event or promotion	Change request — same day
Something looks broken	Text your web person with a screenshot; the site keeps a full history so any change can be undone safely

6 · What It Costs to Run

SERVICE	PURPOSE	COST	ACCOUNT OWNER
Vercel (hosting)	Keeps the site online worldwide	\$20/mo (Pro)	Transfers to you at handover
deltaroe.com domain	Your address	~\$15–20/yr	Already yours

Square Appointments	Booking + payments	Free tier + card fees	Yours
Shopify (when store opens)	The Apothecary	~\$29–39/mo	Yours
Google Analytics + Search Console	Who's visiting, from where	Free	Yours
Roe chatbot · databases · storage	—	\$0 — none needed	—
Wix	Old site	Cancel after launch 	Yours

Monthly budget: ~\$21 at launch · ~\$55–65 once the shop opens (plus card-processing fees on actual sales).

7 · Launch Checklist

1. **Your sign-off** — prices, product names, membership tiers, Roe's voice, the chakra page
2. **Square Appointments setup** — your services, hours, deposit rules (a few days; we assist)
3. **Booking buttons switch** from the Wix scheduler to Square
4. **deltaroe.com points to the new site** — the switch takes a day; Wix keeps working until that moment
5. **Google updates** — Business Profile points to the new site; analytics begin counting
6. **Celebrate.** Then (on your schedule): shop samples → your approval → store opens (4–6 weeks, independent of the website launch)

8 · Ownership — What Is Yours

- **Everything.** The design, all code, all writing, the chakra experience, Roe and her knowledge base, images, and the brand work — yours.
- **All customer data** — bookings (your Square account), orders (your Shopify account), from day one. The website itself stores no customer data.
- **At handover:** the code repository and hosting move into accounts you own; your web person stays on as an invited collaborator, not the owner. The domain is already yours.
- **Independence:** the site is standard, well-documented technology (Next.js) — any competent web developer could maintain it, not just the person who built it.

9 · Quick Reference

NEED	WHERE
See today's bookings	Square Appointments app
Change a session price	Square → Items & Services (+ tell web person for site text)
See shop orders	Shopify dashboard (when live)
Change website words/photos	Change request → same day
See visitor numbers	Google Analytics (we'll set up your login)
Website help	Mike — monkeymike2023@gmail.com (phone: the number you already have for him)
